

NURS 1102 CHARACTERISTICS OF L6 @ PLYM
 like movement - self-initiated self-initiated -
 studies change in position, motion of extend part movement
 responsive hand - initially - Ability to sense
 changes within, or around the system and react to them.
 Growth
 Increase in body size
 Reproduction
 produces offspring
 Respiration
 obtains O_2
 Digestion
 chemically
 Absorption
 immature patients & Smooth muscles
 responsiveness - react - brain stimulation -
 intensely, extend, response - proprio -
 = we know - hormones. Fk Myoid - grow -
 Growth hormone, pituitary gland - let on base -
 in length or width - gigantism -
 to reproduce - procreate - copulation - Sperm -
 head-tail - sperm analysis - morphology &
 count - way where with 10m Sperm -
 head - tail takes -
